ROHDE&SCHWARZ

Contents

This supplement is part of the Release Note 3.2 for the VENICE Client Software.
It details the latest software improvements and contains the following information:

1 Information on the Current Version and History 3
1.1 Version 3
1.2 Recommended Spycer Version 4
1.3 Recommended Firmware Revisions 4
2 Customer Support 5

1 Information on the Current Version and History

Along with this patch release of R&S®VENICE, the firmware revision 7.5.0.8_7.1.0 for Atomix HMDI is provided as well. This firmware release generally improves stability. It is strongly recommended to make a firmware upgrade when installing the current VENICE software version.

1.1 Version

With this patch version further useful and efficient software improvements have been made to offer even more optimized and efficient workflows.
The following options were added or improved:

Improvements

Version	Contents
3.2.0.11	- Changed default auto scale setting to box. - Improvements regarding VDCP ingest.
3.2.0.10	(This version was skipped)
3.2.0.9	Initial 3.2.0 release.

Known Limitations in this Version

Version	Contents
3.2.0.11	- In some very rare cases on Linux systems, the client user interface must be closed via system commands/task manager if it does not end properly. - R&S®VENICE View cannot display the "Time of Day" (ToD) timecode.

1.2 Recommended Spycer Version

The following Spycer version(s) is/are recommended to use with R&S®VENICE:

3.1.0.24

If you are not in possession of the respective software version, please contact the DVS service department.

1.3 Recommended Firmware Revisions

The following firmware version(s) must be installed:

7.5.0.8_7.1.0 (Atomix HDMI)

4.3.0.22_4.0.20 (Atomix DVI)

If you are not in possession of the respective firmware version(s), please contact the R&S DVS service department.

2 Customer Support

Technical support – where and when you need it

For quick, expert help with any Rohde & Schwarz equipment, contact one of our Customer Support Centers.
