

How to install HellGate

Installation of HellGate for QuickTime support on Linux

Related Software Products:

Spycer 1.4.3.3

Required Source packages

HellGate: HellGateInstall.tar.gz
Spycer: Spycer-1.4.3.3-4_glibc2_4.x86_64.rpm

Steps for a new Installation

1. Remove old WINE installations (optional)

```
root:> sudo rm -rf ~/.wine  
root:> rm -rf ~/.wine
```

2. Stop the SpycerAgent process and close Spycer

3. Extract "HellGateInstall.tar.gz"

4. Install the software

Type in the the following lines:

```
sudo ./DVS-HellGate-Wine-Install.sh  
sudo ./Wine-Thirdparty-Install.sh  
./DVS-HellGate-Wine-Install.sh  
./Wine-Thirdparty-Install.sh
```

5. Restart SpycerAgent and Spycer

Use following command to manually install QuickTime codecs
wine <installername>.exe
